Maas Lalani

maas@lalani.dev | https://maaslalani.com | https://github.com/maaslalani

EDUCATION

York University — Toronto, Canada
Bachelor of Computer Science — *Aug 2018 — May 2022*

- Received two full-ride scholarships from Shopify and York University

SKILLS

- **Languages & Frameworks**: Go, JavaScript, React, Ruby, Rails, SQL, Nix, Bash
- **Tools & Technologies**: Kubernetes, Docker, Git, Linux, NixOS, GraphQL

EXPERIENCE

GitHub, Inc. — Redmond, WA
Senior Software Engineer — *Apr 2026 — Present*

- Working on GitHub Copilot CLI

Apple, Inc. — Seattle, WA
Software Engineer — *Aug 2024 — Mar 2026*

- Worked on visionOS FaceTime Team & Persona Enrollment

Charmbracelet, Inc. — New York, NY
Developer — *May 2022 — Aug 2024*

- `Gum`: Designed and built an open-source tool to help developers build better shell scripts (22.6k+ stars)
- `VHS`: Created a tool to help developers record automated demos for their CLIs and TUIs (18.6k+ stars)
- `Huh`: Authored a library for developers to build terminal forms (6.5k+ stars)
- `Freeze`: Shipped a tool to take screenshots of code and terminal output (4.3k+ stars)
- `Pop`: Built a tool for developers to send email from the terminal (2.8k+ stars)

Shopify, Inc. — Toronto, ON
Developer — *Aug 2018 — Apr 2022*

- **Developer Tooling**
  - Improved set up time of Shopify's monolith from 20 minutes to 1 minute through cloud environments
- **Infrastructure Security**
  - Secured multi-tenant infrastructure on GCP and Kubernetes; built on-demand elevated permissions tool
- **Augmented Reality / Virtual Reality**
  - Built pipeline for merchants to upload 3D models; contributed to Google's <model-viewer> library
  - Created size.link, an AR dimension visualization tool for online shopping (100k+ page views)

Locket Labs, Inc. — Los Angeles, CA
React Native Developer — *Jan 2022 — Apr 2022*

- Built and shipped the Locket Android app to the Google Play Store
- 10M+ downloads, 4.7-star rating, 179,000+ reviews

Hawkeye Labs, Inc. — Santa Barbara, CA
Co-founder — *May 2019 — Jan 2022*

- Built research platform for eye-tracking on iPhone (30,000+ sign ups)
- Built accessibility app for motor disabilities (250,000+ downloads, featured at Apple Retail stores)

PATENTS

- Augmented reality-assisted methods for assessing fit of physical objects in 3D spaces
  https://patents.google.com/patent/US20220130126 (Pending)
- Computer-implemented systems and methods for in-store route recommendations
  https://patents.google.com/patent/US20220092681 (Pending)
- Systems and methods for generating AR content based on distorted 3D models
  https://patents.google.com/patent/US11398079 (Active)
